

U. S. ORDERS FREIGHT RATES CUT

KARL GETS AN ARMY, AGAIN FIGHTS FOR AUSTRIAN THRONE

FORMER PREMIER HAS PROVISIONAL STATE PREPARED

EX-EMPEROR ARRIVES IN AIRPLANE TO SEEK THRONE.

BACKED BY ARMY

Situation in Vienna Tense; Czechs Reported Mobilizing Forces.

[By Associated Press.]

Vienna.—The allied representatives in Budapest Saturday made a joint protest to the Hungarian government against the return of Emperor Charles to Hungarian territory.

[By Associated Press.]

Vienna.—Former Emperor Charles of Austria-Hungary, arrived at Oedenburg, Burgenland, Friday afternoon, in an airplane from Switzerland, according to an Oedenburg message Saturday and is reported to be proceeding toward Budapest, escorted by troops.

The Oestenburg forces immediately went over to Charles on his arrival at Oedenburg, and he was acclaimed King according to the messages.

A provisional government, the ad- vice state, has been formed in Burgenland in the ex-Emperor's interest under Count Andrusky, former Aus- trio-Hungarian foreign minister.

The railroads and telephone, and telegraph lines have been cut at the Hungarian frontier.

The situation in Vienna is tense, as the result of the former ruler's re- sponding to it, it is rumored here, that the Czechs are mobilizing their army.

Guards Called Out.

The Austrian government announced Saturday forenoon that all precautions had been taken to deal with the situation. The entire police force and the city guards were called out and extra ammunition was dispatched to the frontier posts.

Political observers say that the Austrian supporters of the ex-emperors will suspend any action in his behalf on Austrian territory pending a decisive outcome of his venture into Hungary.

Admiral Horthy, Hungarian regent, is rumored here to have fled from Budapest Saturday morning following news of the arrival of ex-Emperor Charles in his former domain. Budapest advises that a legitimate government had formed there.

WILL OUST FORMER KING AS BEFORE, CLAIM

Paris.—The Hungarian government will act as it did on occasion of the previous attempt of former Emperor Charles to resume the throne in Hungary, according to the statement obtained here Saturday and will take measures to expel the former monarch from Hungarian territory, it is declared.

Already measures to this end have been initiated, says a Budapest dispatch to the Swiss Telegraph agency, received here from Bern. The news of the government's decision is to permit the ex-emperor to remain in Hungary came from an official source in Budapest, the message advised.

[By Associated Press.]

The district of Burgenland is dis- pected between Austria and Hungary. It was awarded to Austria, but was occupied some months ago by Hungarian irregular troops.

At a conference in Vienna last week, Karl was decided, Burgenland should be turned over to Austria, but that Oedenburg and its surrounding district should hold a plebiscite which would decide the future status of that immediate territory. Hungarian leaders, particularly former Premier Friedrich, declared they would not withdraw the Hungarian troops in the district.

Behind the back of the Hungarians to retain possession of Burgenland there has been the threat of a return to West Hungary of former Emperor Charles.

DIES IN DARLINGTON

JAMES DRIVER, 75, a native of Janesville, who has lived here for many years, was buried here Wednesday. He was a Civil war veteran.

Recovers Tool Kit

E. R. Randall, 2220 Magnolia avenue, lost a set of wrenches. He did the same thing most people do when they lose anything—im- mediately a lost ad in the Gazette Classified columns. The person who found the wrenches did the same thing most people do when they find anything—he read the Classified Ads to see if he could find out to whom the wrenches belonged.

The Classified Ad functioned in the usual manner by bringing the lost article back to its owner.

Ninety per cent of the lost and found articles advertised in the Gazette Classified columns are returned to the rightful owners.

CHECK HELD FOR MAN MURDERED AT DARLINGTON

There is one check and discharge paper waiting at the Service Recognition board office at Madison, advertised in the Gazette for which no call will ever be made.

That one is for Ernest Stadler, Swiss, cheese maker of Darlington who was shot and killed by Marvin Blaum, in a party Christmas night. Blaum is now serving a term in the penitentiary.

Miss Edith Alden, secretary of the local Red Cross through the assistance of the Gazette has located Charles D. Hoag, for whom a check and discharge papers are held at the office at Madison.

LORILLARD DENIES TOBACCO "TRUST"

Nothing to It, Says Local Manager—Growers Glad of Suit.

Denial that there is an alleged combination or "trust" of the big tobacco companies of the country to control the market and eliminate competition, was made Saturday by H. M. Keller, local agent of the P. Lorillard company. Suit against 11 of the companies was started by Attorney General William J. Morain at Madison Friday. Mr. Keller had no further comment to make. Refusing all inquiries to the office of his company at Madison.

Announcements that Attorney General William G. Morgan had started an anti-trust suit against the alleged tobacco "trust" in the city proved a sensation among growers and buyers in this city. There was much speculation great interest, but little official comment.

Good Thing, Say Growers.

Generally it was agreed that the antitrust suit, if put through to successful conclusion, would prove a good thing for the Wisconsin tobacco market.

That combination of buyers, who control the tobacco of the state, sought a freeze-out among the small dealers, was alleged one grower, who also handles tobacco in the case. The tobacco market could not go long in the present status. We didn't have a show.

Prices Too High.

Prices on each tobacco have been placed too high," declared C. E. Culver, president of the Rock county growers' association. "I would like to see the cigar that really had 10 or 15 cents' worth of American tobacco in it. The consumer is not getting true value and I am of the opinion that the big buyers of our tobacco have set too high a price. The cigar makers cannot pay it and make a fair profit on cigars."

The suit is not directed against the cooperative farmers' pool, for the pool is controlled by the state department of agriculture. The suit, it is believed, may prove a valuable aid to the growers who have pooled their crops by paying their own packing costs.

MOTORIST, UNHURT, DIES FROM FRIGHT AFTER AUTO CRASH

[By Associated Press.]

One Alphonse Elky, 31, a resident of Townsend, Oconto county, died from the effects of fright and excitement caused by the overturning of an automobile in which he and 2 brothers were riding.

The automobile was rounding a sharp curve between Townsend and Mountain, when it struck a tree which the wind had tumbled across the road. The car was overturned.

While the brothers were picking up the scattered articles thrown from the machine, Alphonse seated himself on the running board of the car and a few minutes later toppled over. He died before a physician arrived.

Anti-American Demonstration, Plan of Reds

[By Associated Press.]

Paris.—French communists meeting last night adopted a resolution that a demonstration would be held Saturday night before the American embassy in protest against the flinging of a Massachusetts state flag in the case of Nicolo Sacco and Bartolomeo Vanzetti, two Americans convicted of murder. Five persons were wounded Friday night by the explosion of a bomb thrown into a squad of police who were attempting to disperse a crowd near the hall where the meeting was held. Of those injured, 12 are said to have been police.

No Trace Yet of Auto Bandits

[By Associated Press.]

After a day of searching had failed to show any trace of the two men who helped up, beat and robbed Frank Sacker and George Miller, of Monroe Thursday night, near Brookfield, B. Elliott, who was confident Saturday that the men had not returned to Elliott as reports from Brookfield stated. Having been warned of sufficient time, all roads were covered and the bandits could not have gotten through the dragon, they said. Sheriff Buchier and his deputies were making a search for the quintet because it was thought the bandits were making their way to Milwaukee streets as Whitmore was roundng the corner Friday night.

When the hat off his young daughter was blown into his face, cutting off his vision, J. E. Whitmore, of the Roseling-Whitmore Sales and Repair company, Franklin street, drove his light delivery car into an oncoming trolley. The daughter was slightly injured under the right eye by flying glass from the window of the trolley. The accident occurred on Main and Milwaukee streets as Whitmore was roundng the corner Friday night.

Final Bulletin on all games at Gazette Bulletin Board tonight.

Washington.—The gradual withdrawal of men from Garmon, intended to start production of the new concrete road from Rockford to the Wisconsin state line Saturday afternoon, when he smooths over the last shovelful of concrete.

Railway Labor Board in Session

Railway labor board in session in Chicago. Standing, left to right: A. O. Wharton, Horace Baker, J. Elliott and W. L. McMenimen. Sitting: Samuel Higgins, R. M. Barton, chairman, and Ben W. Hooper.

Rates Must Fall, EXTRA! Says Farm Bureau

[By Associated Press.]

Madison.—Railway executives and workers here and elsewhere are supporting the committee of the Wisconsin Farm Bureau federation, representing thousands of farmers, to follow the leadership set by agricultural interests "in sacrificing on their investment of capital and labor in order that the threatened strike may be settled without economic disaster to the country."

Their appeal urges both employers and employees "to accept such reductions of incomes and wages as will result in a more nearly equal division between the incomes of capitalists, laborers, manufacturers, retailers and farmers."

Good Thing, Say Growers.

"It was agreed that the proposed reduction in wages will be reflected in reduced rates, demanding the establishment of sufficiently powerful tribunals to effective adjustments between the parties and to remedy intolerable conditions."

Hit Rate Schedule.

In a year sent to heads of unions and railway executives, the Wisconsin Farm Bureau asks "what assurance the farmer of this state have that the proposed reduction in wages will be reflected in reduced rates?"

Wisconsin is a heavy favorite and the Illinois a heavy favorite and the Illinois held, out only a night's time. Score, Wisconsin 1, Illinois 0.

Football Games

[By Associated Press.]

Chicago, 3; Princeton, 0. (First half.) Harvard, 7; Penn State, 0. (First period.) Notre Dame, 0; Nebraska, 0. (First period.) Ohio State, 7; Michigan, 0. (Second period.) Yale, 0; Army, 0. (First period.)

WISCONSIN-ILLINOIS.

Urbana.—With a crowd of 15,000 spectators packed around the field, Illinois clashed with Wisconsin here this afternoon. The Badgers were a heavy favorite and the Illinois held, out only a night's time. Score, Illinois 1, Wisconsin 0.

Hit Rate Schedule.

A warm sun beat down on the field, forcing the spectators to shed their overcoats. It was almost too hot for football.

Wisconsin crashed over with a touchdown near the close of the second period when Illinois punt was blocked on the 27-yard line and blocked on the 27-yard line.

Illinois grabbed the ball and raced across the Illinois goal for a touch down. Sundt failed to kick goal. Previously Tobell attempted to kick a field goal from 34-yard line, but missed the post by inches. The teams fought with such desperation in this period, that injuries were frequent.

Gibson, the Wisconsin quarterback, was forced out because injuries and Gill took his place. Score, Wisconsin 1, Illinois 0.

PIONEER'S DEATH RECALLS TRAGEDY

[By Associated Press.]

Rock County Man, Whose Wife Was Murdered in 1893, Passes Away.

[By Associated Press.]

Clinton.—One of the greatest tragedies in the history of Rock county was recalled here Friday night with the death of Arthur Horn, 55, a pioneer resident of the county, whose wife was murdered here April 15, 1893, by Mathew Elton, who died in the penitentiary at Waupaca, where he was held for trial.

Arthur Horn was born in Maine and settled with his parents in the town of Bradford, Oconto county, where he was employed in a lumber mill. He married in 1875, and his wife died in 1885. When he retired and sold his place to Robert Horn, his son, who survives him.

Mrs. Horn was murdered by Mathew Elton, who shortly after marrying her for the second time, came to live with her. Elton quarreled frequently with his wife and Mrs. Horn was the one who patched up many of their difficulties. On April 15, 1893, Elton, in a fit of rage, murdered his wife and Mrs. Arthur Horn, placed her in the cellar, got her home and fled.

Elton was captured and tried for the crime. He was sentenced to life imprisonment.

He was paroled in 1904 and became a successful farmer in Clinton. He died Saturday.

FARMER ARRESTED IN CHICAGO WITH GIRL; NOW IN JAIL

[By Associated Press.]

Chicago.—Clarence Dahl, a railroad farmer who created a sensation here when he eloped with Hazel Olson, while she was in the hospital, was not released Saturday morning. He was ordered to stay in jail at Madison until trial on a charge of violating state law.

Dahl pleaded guilty to the charge against him, but Judge Hoppmann deferred sentence.

Dahl also may be prosecuted for violation of the Mann act.

HIGHWAY OFFICIAL TO COMPLETE ROAD

[By Associated Press.]

Beloit.—A. R. Carter, highway commissioner of Winnebago county, will signalize the completion of the new concrete road from Rockford to the Wisconsin state line Saturday afternoon, when he smooths over the last shovelful of concrete.

His first attempt clearly all excepted, so he had to go to Rockford again to get more concrete.

Tom King passed over Cole's head, losing 20 yards for Chicago, and Romney punted over the line. Halladay went to Chicago, left end, and Baker, right, to take punts for Princeton. The game ended with a 21-yard line, when the period ended.

THE SOCIAL CHRONICLE

SOCIAL EVENTS

SOCIAL EVENTS
SUNDAY, OCT. 23

AFTERNOON—Girl Reserve story hour at Y. W. C. A.

MONDAY, OCT. 24

TUESDAY, OCT. 25

Wednesday—Dolphins with Mrs. Snyder.

Evening—Ladies Aux. American Legion Card party at St. Patrick's hall.

To Meet Monday—The D. Y. G. Girls of the Presbyterian church will meet in the church parlors Monday night for a six o'clock supper and social meeting. The supper will be in charge of Misses Lucile Krontz and Winifred Hill.

Entertained at Belmont—Mr. and Mrs. Fred Pauley, Walla Walla, Wash., and Mr. and Mrs. Frank Baines of this city, were entertained at a dinner party last night at the home of Mr. and Mrs. Walter Holmes, 793 South Main street. Mrs. Pauley, Mrs. Baines and Mrs. Holmes were former classmates, graduating from the Janesville high school with the class of '79.

Art League Meets—Interesting reports from the Appleton state convention held last week were given by the delegates from the Art League at a meeting of the league held Friday afternoon at the library. Miss Maude Sykes reported the proceedings of Wednesday with the opening speeches and words of welcome. The first district, of which Janesville is a part, had the largest representation, she said, having 50 delegates. Donations amounting to \$1,556 were given to the silver jubilee fund for educational purposes. Miss Ida Harris reported Thursday, when the emphasis was laid on education. Needed legislation for rural schools, free kindergarten in college and the work of rural clubs were some of the things mentioned. Mrs. J. T. Hooper told of the art exhibits and the work of the art committee, of which she is a member, and spoke of the papers and addresses given Friday. The whole convention, she said, was characterized by the business-like way in which the proceedings were carried out and the fine addresses given by the women speakers who presented the subjects in a clear and logical fashion.

For Miss Butler—Mrs. A. E. Nehner, 229 North Jackson street, gave a birthday party for Miss Lenore Butler. Eighteen friends enjoyed the evening with games, music and dancing and a three-course supper was served at 11:30. The table decorations were pink and white. The guest of honor received a number of beautiful and useful gifts.

Rex Dance Wednesday—Another Rex dance will be given in the East Side Odd Fellows' hall Wednesday night, with Hatch's orchestra playing. These dances are given every two weeks for members and friends only, and the success of last year promises to be repeated, this season.

Mrs. Flaherty Entertains—Mrs. W. F. Flaherty, Milton avenue, entertained at a pre-dinner party Saturday night. Twenty guests were invited and a number of men o'clock. The decorations were fall flowers and autumn leaves. At cards in the evening, the high score winners were Mrs. Martin Morse and Roy Tarrant, Avalon. Mr. and Mrs. Morse were the guests from out of the city.

Surprise Mrs. Bailey—Miss Gertrude Bailey, who arrived at her 13th birthday Friday, was given a surprise party by the members of the Blue Bird Hiking club, who came with their supper and many gifts at six o'clock. The evening was spent with games, music and different contests. The club members are the Misses Jean Sutherland, Leila Bostwick, Core Lee Beers, Betty Haunerman, Marion Lee Mildred Malmberg, Gladys Waggoner, Ann Palmer, Emily Sheldon, Helene Lintelman, Jane Gage and Nancy Kehoeck. The party was promoted and the supper arranged by Miss Betty Haunerman.

To Have Party—Mrs. T. P. Shreve, 405 South Main street, has given out invitations for a Holloween party Friday night.

Mr. Lamb's Dinner—Mr. and Mrs. W. F. Richardson and Mr. and Mrs. Fred Capelle and Miss Etta Capelle have gone on an automobile trip to the Kickapoo valley, near Prairie du Chien. They left Friday and will return the first of the week.

Luncheon for Miss Granger—Mrs. Louis Anderson, 303 South Third street, gave a complimentary luncheon Friday noon for the invited guests, who will be married early in November. Twelve of her intimates were guests. The luncheon was served at one table, where a yellow color scheme was carried out. The centerpiece was made up of yellow zinnias and cosmos and yellow candles with bowls of yellow flowers on each side were used. Streamers of yellow satin ribbons stretched to each place and at Miss Granger's place was a small bouquet. Bridge was played in the afternoon. Mrs. George W. Jahr, Jr., Mrs. Frank Sutherland and Mrs.

Rev. G. J. Muller IS GIVEN SEDAN BY HIS PARISH

Rev. G. J. Muller, pastor of the First Lutheran church, is now the owner of a Ford sedan, presented to him by members of his parish. The presentation was made Thursday night, following an entertainment given at the church by the junior girls. William Heise making the presentation speech.

Dr. Pember Weds Chicago Girl

MISS HAZEL LUCKOW

The marriage of Miss Hazel Luckow, daughter of Mr. and Mrs. Charles Luckow, Chicago, and Dr. Aubrey E. Pember, son of Dr. and Mrs. J. E. Pember, 133 South Jackson street, Janesville, will take place at 3 o'clock Saturday night at St. Paul's Episcopal church, Chicago.

"I SEE BY THE GAZETTE"

John Miller to L. Schuler, W. D. Sub. to marriage of Jones 15 and 16, block 10, River Heights, addition, Janesville.

William Miller to L. Schuler, W. D. St. Lots 9 and 10, block 10, River Heights, addition, Janesville.

Charles F. Schumacher and wife to Alfred V. Sawyer and wife, W. D. S. E. 24, S. E. 24, section 3 and N. E. 24, section 10, Lina.

RUSSIAN COOK GETS 50,000 RUBLES IN A DAY

Petrograd—The impression abroad that there are no servants in Russia is an error. One gets a different impression in Petrograd, where the Kremlin walls are high and houses made in mud are seen through water of the windows of the various apartments, where prominent officials of the government live.

And when one tries to hire a cook, he finds it is not easy enough if a large enough salary and sufficient foodstuffs are offered. The cook, in the leading cafe in Moscow, is said to be getting 50,000 rubles a day and three square meals.

Teasing is also forbidden by decree, but waiters and other servants not only expect them but frequently demand them and express a desire for sugar or other foodstuffs, rather than rubles.

DUROC BREEDERS LAY PLANS FOR AUCTION

Duroc-Jersey breeders of Rock county met Saturday afternoon in the city hall to discuss plans for their annual sale in Janesville. E. H. Parker is president and L. A. Ruchti, secretary of the county association.

Wakes After 9 Years in Catastrophic Trance

Johannesburg—After being in a cataleptic trance for nine years, Anne Sanpoel has awakened in possession of all her faculties. Her voice is weak but distinct.

Mr. and Mrs. E. M. MacCauley, Wausau, settled Mrs. J. Roy, 125 North Washington, Milwaukee, where they attended the funeral of a relative.

Mrs. E. M. MacCauley, Wausau,

and Mrs. B. Whiting, 102 North Franklin street, spent Thursday with Mrs. Willie Munger, Beloit.

Mr. and Mrs. John Newman, Milwaukee, are visiting at the home of J. F. Newman, Black Bridge road.

Mrs. Fred Collyer, of the Rhode Royal circus, home for a visit with her parents, Mr. and Mrs. J. J. Nixon, Town of Rock, Mr. Collyer is director of the horses in the show, has gone south for the winter and will be in Mrs. Collyer here when the show closes. She is treasurer and bookkeeper during the summer.

Mrs. Dale Kent, Oakland avenue, is home from Chicago, where she spent several days.

Marlin H. Vosburgh, Osgood, Ia., is visiting his brother, Frank Vosburgh, 824 Sherman avenue.

Mrs. Eva Childs, Supreme Oracle of the Royal Neighbors of America, is attending a number of meetings in the state.

Mrs. H. M. Dedrick, 345 Milwaukee avenue, is confined to her home with illness.

Mrs. Sannie Sutton, Edgerton, will be the over-sunday guest of her sister, Mrs. G. H. Fox, 344 Milton.

Mrs. I. P. Woldenky, 414 South Third street, is confined to her home with an attack of tonsillitis.

Mrs. Gertrude Bucholtz, Prospect avenue, who recently underwent an operation at a Milwaukee hospital, is leaving Wisconsin friend during her convalescence.

Frank Craig, ticket agent for the Northwestern station here, left Wednesday for his home in Ohio, where he will spend a short vacation.

Mr. and Mrs. John Morality, 327 Center avenue, announce the birth of a daughter, Mary Margaret, at Mercy hospital, Saturday, Oct. 13. Mrs. Morality was Miss Mary Kelleher.

Mr. and Mrs. S. S. Bean, Peoria, Ill., announced the birth of a daughter, Helen Elizabeth, born Oct. 13. Mr. and Mrs. Bean make their home in this city for several years.

Mrs. Martha Bolles, physical director of Kemper hall, Kenosha, is spending the weekend with her uncle, Stephen Bolles and family, 925 Walker street.

Mrs. Earl Armstrong, Wichita, Kan., and Mr. and Mrs. H. S. Board, Los Angeles, Cal., are visiting at the home

ENDEAVOR UNION MEETS IN CLINTON

Southern Wisconsin District in Session Through Three Days.

[SPECIAL TO THE GAZETTE]

Clinton—About 100 delegates from Janesville, Beloit, Milton, Mill Junction, Albia, Elkhorn, Delavan, Emerald Grove, Mineral Point and Clinton were present for the opening session of the 27th annual convention of the Southern Wisconsin District Christian Endeavor union, which opened a three day session here Friday night.

The meeting was a song service at the Baptist church. The Rev. A. D. McKay, pastor of the Presbyterian church, lead the devotions. David H. Holt spoke on "Why Came Charles E. Fisher, Janesville.

Build a Community Center and Convention Hall for the city; for athletics, conventions, musical concerts, civic meetings, and have it belong to the whole citizenry. Also, make part of a program to build muscle and endurance for the people the year around.

Complete the city plan. Make more small parks and playgrounds and provide at least

one large park where the whole people may recreate at will.

Camp for int'l tourists coming to Janesville

and stay through.

Create a permanent memorial for the soldiers

of the World War, suitable and adequate

and preserve the relics and souvenirs of that and all other American wars in a public place.

Finish the paving of Janesville streets and

complete the sewer system.

Make all main highways into city of concrete

and asphalt.

Keep the city looking bright and clean with

paint and the streets free from dirt.

Either build a new hotel or buy the old one

and convert it into a tourist hotel so as to take

care of the traveling public and be able to

handle conventions.

Finish the high school as early date and

give the children proper educational facilities.

"THEIR MUST BE NO STRIKE."

It appears that there will be no strike until after every means known to the government has been exhausted. With the action of the labor board in assuming the power which is at least by legal inference, conferred upon it, there must be obedience to its orders by both unions and railroads, that no strike shall be called until after the last effort has been made to avert it.

That will mean no strike on October 30 unless there is direct violation of the order. Into the situation enters therefore the general proposition that the wage cut of July 1, shall be dependent alone on a reduction of freight rates so as to absorb the \$400,000,000 decrease in wage payments and that the public shall be so much the beneficiary.

Taking 100 points as the base for, 1913 wages and freight rates the present rate figure is 262 points and the rail wage scale is 226 points. There is therefore a difference of 36 points already, with no wage reduction between freight rates and wages. On the same basis farm products at the farm are only 169 points as against the 100 for 1913. There is a difference of 153 points between rail freights and farm products, all in favor of the railroad. It does not take a wise economist to know what effect this is having on the cost to the general public.

With the public so deeply interested, it is the part of wisdom for a general pause to be made to see how the battlefield will look when the conflict is over. Underwood, president of the Erie, says he wants a strike, so does Cuyler, president of the railroad executives. They are apparently blind to the inevitable public distress. So would be the union leaders in ordering a strike. Selfishness dominates. They are ruthless masters.

There must be no strike—it must be averted by being square with the public and the measures necessary by the constituted authority to show that "being square" is demanded.

Some men are so lacking in thrift that the only thing they leave is a widow.

ECONOMICS MIXED WITH POLITICS.

Difficulties of another bank in North Dakota again calls attention to the danger of mixing politics with economics or with business, the general head under which we usually place all economic questions. In a time when the political air seethes in North Dakota and the nonpartisan league is fighting to continue its existence there, it grows more evident that solutions of the problems faced in that state have nothing, or little at best, to do with legislation and the questions are not finally determined by statute laws.

One reason why North Dakota has failed and the farmer has confronted the conditions which he has attempted to correct by legislation, is that he has put all his money in wheat. The nonpartisan league was made possible by the cultivation and marketing of wheat. The league says nothing about soils, how to grow more wheat, but it is concerned only with the marketing on lines that may defy, and often have, every basic rule of economics. The North Dakota man has had one rival in the one-crop fold—the cotton planter of the south. He has awakened to the fact that all the laws in the world would not save him and only a diversification of crops would eventually take him from the slavery class.

Eight months of the year for the wheat farmer are non-productive. He cannot make a living confronting that idle time. The greatest problem is what to do with those nonproductive months: all the political parties of the universe cannot solve that. It is outside the realm of any organization for political purposes. It is as absurd to think that law can change a condition like this as it would be to attempt to legislate a new tire on an automobile.

North Dakota has attempted the impossible. Let us see what Wisconsin has done: When the state was first settled, wheat raising was the great business of the farmer. But after awhile the bugs and the worms and flies came and crops were precious. He did not go to the legislature to look for law to change the situation. He changed it. He diversified crops. He has made Wisconsin from a one-crop state to so many firsts in dairying, in live stock, in cheese making, and along down the line in potatoes, in clover, in beans and peas, in barley, and at the same time he has made the state a leader in industry. Take away the timber interests which of course North Dakota has not, we still have a billion of dollars in manufactured products. In the Gazette, Thursday, was an article showing that Rock county would build a fence around itself and go on living

WEALTH UNDER WATER

By FREDERIC J. HASKIN

Washington, D. C.—There is wealth under the sea, not far from the shore, for any one who has enough enterprise to go and get it.

This submarine treasure is not in the gold and bullion of lost Spanish galleons. It is in the form of seaweed.

At least sea weed is one of the most abundant and easily accessible forms of it. There is much untouched wealth in the ocean. The seas of the world are its great unexploited natural resource. Men have taken fish out of them, almost exhausting the more easily obtained supplies in some cases, and that is all. The saying is literally true that there are better fish in the sea than ever were caught. And besides fish, there is wealth in hundreds of other things.

The people of the United States have been especially backward about exploiting the wealth of their coastal waters. They waste fish which other countries consider delicacies. They import at great expense sea products that are daily washed up on their own beaches.

The Bureau of Fisheries from time to time is attention to some of these neglected opportunities. Thus it has just completed an investigation of certain sea weeds from which forms of gelatin are extracted. It has been discovered that we are importing from the Orient products which we could make at home to our profit. And no large investment is required either. There is a chance for that enterprise, which is our national boast, to develop itself.

Take the case of agar-agar. Agar-agar, if you never heard of it, is the commercial name applied to a dried gelatin which is extracted from certain red algae that grow in coastal waters. It has many uses. Its most important one in this country is that of a culture medium in which to produce certain bacteria for purposes of inoculation. Nearly all hospitals and laboratories have to have it. It has also been used with success as a remedy for chronic constipation. In the Orient it is highly esteemed as a food, but Americans have not learned to eat it much.

We import about 240 tons of this substance every year, and it is worth nearly half a million dollars. It comes from Japan, China, Malaysia, and Ceylon.

That half million could just as well stay at home. Moreover, besides producing all we need, we might greatly extend the domestic uses of it, especially its use as a food. For the Bureau of Fisheries announces that there are a dozen or more seaweeds in the waters of the Pacific coast which contain agar-agar. Four of these have been studied in detail and are pronounced as good as or better than seaweeds used for the same purpose in the Orient. Of course, cost of production is a factor to be considered, but there is no reason to believe that we could not produce the substance more cheaply than we can import it. The methods of preparing agar-agar from these seaweeds are known in detail to the Bureau of Fisheries, and can be obtained by anyone interested. They do not involve an expensive plant or equipment. Rakes, kettles and wooden trays seem to be about the only things necessary. The product must be frozen, and where temperatures do not go low enough to do this out-of-doors, some form of artificial refrigeration would have to be employed.

This is only one of several uses to which seaweeds may be put. There is already in this country a small industry in the preparation of gelatin from the seaweed commonly known as Irish moss. This gelatin is widely used in food and has much more gelatinizing power than the animal gelatine. This Irish moss gelatin, or Carrageenin, as it is called in commerce, has many other uses, and its manufacture might be extended. It is used in making water paints, shoe polishes, and as sizing for paper, cloth and thread. It is used in shaving and other soaps because of the fine velvety lather it produces. It is used as a clarifying agent in making oil and beer. Bandoline, a perfumed mucilage made from Irish moss, is used to make unruly hair and mustaches behave. The substance also has medical value.

The chief source of supply for Irish moss is the region around Scituate, Mass., where, about 30 men were recently engaged in collecting it. There are half a dozen other places in Massachusetts, New Hampshire and in New York where the moss is collected and prepared for market. Doubtless there are many other places where it might be obtained. Its preparation is very simple. It is merely washed in sea water and dried on the beach until bleached. It is then packed in barrels and sold. It brought about 10 cents a pound in 1920. The Bureau of Fisheries can supply further details of methods and localities to any one interested.

For a long time independent of the outside world, the South with cotton, is a buyer of practically all it uses. Some years ago it was figured that Georgia with a cotton crop of \$150,000,000 paid out for things that could have been produced in the state the enormous sum of \$175,000,000. That was \$23,000,000 in debt to outside states. A wheat country—where wheat only is the money crop—is the same boat.

There is little wonder then at the failure of the nonpartisan league political movement in North Dakota. How much more is it lacking as a solvent of economic problems in Wisconsin? Townley may have helped, designing and self seeking demagogues, may have contributed to the failure in North Dakota, but the nonpartisan league would have failed utterly anyway, no matter who might have exploited it.

A Liberty bond in the hard is worth some 25,000 German marks in the same place.

NO NEED FOR ILLITERACY IN WISCONSIN.

There is no excuse for any man being illiterate in Wisconsin. All he needs is the will to do. Opportunity is here at hand anywhere, everywhere. But in Wisconsin there is a shameful number of illiterate people. Every man should be able to read and write in the language of his chosen country. Some day all men will be compelled to know how. Then also men and women who make a living in the United States will be asked, and very firmly too, to either become citizens or go back to their native land.

The census report says there are 50,397 illiterates in Wisconsin. All he needs is the will to do. Opportunity is here at hand anywhere, everywhere. But in Wisconsin there is a shameful number of illiterate people. Every man should be able to read and write in the language of his chosen country. Some day all men will be compelled to know how. Then also men and women who make a living in the United States will be asked, and very firmly too, to either become citizens or go back to their native land.

FORTY YEARS AGO.

Oct. 22, 1881.—An adjourned meeting of all veterans of the Civil War was held in the common council room last night and upon motion, it was decided to form a local chapter of the G. A. R. Thirty-nine signed the roll and were mustered in by Henry P. Fisher, Milwaukee chief muster for the state, who stated that many chapters are being organized in the state. The G. A. R. was first started in Indianapolis in 1866.

LOOKING BACKWARD

THIRTY YEARS AGO.

Oct. 22, 1891.—Superintendent Blunk and the street railway company have received orders to ship nine of the 21 horses here to Chicago at once. Thereafter only two cars will be run, making trips every thirty minutes, as the patronage is not enough to warrant any more. Mr. Vanderbilt and 75 directors of large eastern railroads, passed through the city yesterday in their trip through the northwest.

TWENTY YEARS AGO.

Oct. 22, 1911.—The new St. Paul station on North High street may be built this fall. Those bad baggage stored near the locality have been notified to remove it and the ground is being cleared. Rev. W. A. Hall of the Court Street Methodist church has been removed to Stevens Point. A reception was held for him last night in the church parlors.

TEN YEARS AGO.

Oct. 22, 1911.—Sunday.

JUST FOLKS

LESSONS OF THE GARDEN.

The lessons of the garden—oh, I read them every day. They teach me not to mourn too much for the joys that pass away.

The tangled weeds which choke the rose till it grows gaunt and thin Remind me of the paths of man which are beset with sin.

Her bloom some lovely things for me to pay me for my toll. I carried every store away and broke the stubborn.

I guarded them from heat and drought and learned this truth anew—that all rewards are measured out by what a man will do.

And now my garden's brown and bare and all my vines are dead. Yet I have known the loveliness of roses white and red,

And I have owned a Summer rich with fragrance and delight.

And Winter, be it cold and drear, is but the garden's night.

Within the walls where I have dwelt sweet joys have come and flown.

But they were glorious Summer years that once were mine to own.

And what if now the winter-time of sorrow brings its pain?

Some day another Spring shall come and I shall smile again.

ON THE SPUR OF THE MOMENT.

By ROY K. MOULTON.

THE PANCAKE SEASON IS ON.

The flapjacks are flapping, for winter is night. The boys in the windows are passing 'em high. They're hot off the griddle.

They're dough in the middle, but I am a fan for 'em so what care?

Come on, Indigestion.

I'll not ask a question—

You'll get me I know, but I'll croak with a cheer.

Half the women in the world don't know where the other half get their gossip.

An optimist is a person who eats candy off an uncovered street stand.

NOTHING FOR THE MURPHYS.

In the Rutherford postoffice the following conversation took place:

"Anything for the Murphys?"

"No, there is not."

"Anything for Jane Murphy?"

"Nothing."

"Anything for Ann Murphy?"

"No."

"Anything for Maggie Murphy?"

"No."

"Anything for Tom Murphy?"

"No."

"Anything for Bob Murphy?"

"No, not a bit."

"Anything for Terry Murphy?"

"No, nor Pat Murphy, nor Dennis Murphy, nor Pete Murphy, nor Paul Murphy, nor any Murphy—dead, living, born or unborn, native, civilized or uncivilized, savage or barbarous, male or female, black or white, unfranchised or unfranchised, naturalized or otherwise. No, there has positive record for any of the Murphy's, individually, jointly, severally, now and forever, one and inseparable."

"The Love Pendulum"

By MARION RUBINCAM

I KNOW THE WORST. The old life had completely swallowed me up. Fight as I would, there was no getting away from it. It was not only that I grew even when the queer little chattering feelings that crept over me as I watched my husband and "Gwendolyn" was every evening—it became even every woman.

And that, I think, is the worst thing in the world. One known enemy can be fought with some sort of intelligence—but what is the woman to do who must look upon every other member of her own sex as a possible problem, let us say, if not an actual enemy?

That evening Win was devoted to Gwendolyn. But the next evening we were at a theater party, and there were four women and two men. Three of us sat in the front of box—Jimmie Soule and a wordily-wise little woman whom I knew to be 30 but who posed as 22; and Win, said behind us. It was, only accidentally that I turned to find my fur—and now Win holding hands with the girl, their hands more or less concealed under their great feather fan.

I turned back from that a little shocked and revolted, not at what I saw—it was too silly and childish to be shocking—but the sudden discovery that Win's ideal of everything fine and good, was getting to be nothing more than a cardboard.

So Win began to be only Gwen—it was to be every attractive woman!

Again I tried going my own way, as that winter ran along. But my way and Win's way more or less coincided. They had to, for we were naturally invited together.

By this time Gwen had succeeded in one, at least, of the schemes she was forever playing with. She managed to get him to believe that our old friend Nardoski was made conductor of one of the symphony orchestras. This gave him immediate social position, to say nothing of immediate money, which I suspect he needed.

Gwen still played patroness to him—this time as the successful patrician. She had a box at very concert, and she attended the shows. When Nardoski was announced, he always bowed to her as well as to his audience. And Win was asked again and again to go with her. Gwen asked me too. I must say for her that she rarely slipped on a question of social form. But as often as possible I managed to have other things to do, so I could refuse.

"I miss my Cherry Blossom at my concerts," Nardoski managed to say to me once when we met at a party.

"Why the Cherry Blossom?" I asked somewhat rudely. I think.

"Don't you remember?" His little brows and puckered mouth expressed

Monday—Hesitation

YOUR WEIGHT AND DIET.

The man or woman who is considering dieting to reduce—or to grow fat, for that matter—must think not only of the kind of food to be eaten, but also of the kind.

There was a very busy man who asked me very seriously the other day whether he could not live by taking half a dozen raw eggs in milk every day—six eggs, six glasses of milk, taken two or three hours apart. "Saves so much time dining and sitting around the table," he grumbled, "and the exceedingly bad port wine." I hope persuaded him that planning as raw eggs and milk where he needed a more varied diet to work and live on.

The average fairly active woman needs 2500 calories of food per day. A scientist would divide this up so: 10 p. c. Protein..... 260 calories 25 p. c. Fat..... 625 calories 65 p. c. carbohydrates, 1025 calories

2500 calories

Of course you must know a lot about food values to know the percentages of these in each article of food. The diet above would have 10 ounces of fish, fowl or lean meat, or nine eggs to supply the protein, and five fat sized pats of butter for the much fat. Your tastes are a fast standard to go by; plus your common sense.

But you should not get all your protein from eggs nor all your fats from butter. You need variety in your diet.

Maria—Yeast cakes that are made by any reliable druggist are the kind to use—only be sure they are fresh, as stale yeast will be more disturbing to the digestive organs—than stale food. Consult the doctor about these hot flashes. If you are eating much meat, especially red meat, this will aggravate such a condition, also.

Nancy, Blue Eyes—Send a stamped addressed envelope for the blackhead formula and bleach the arms with the juice from cucumbers or lemon juice.

Why? asked the warden.

"Oh, just a little sentiment. I suppose the prisoner explained. "You know, it's the first dollars I ever stole."

Drawing Lessons for Our Kiddies

MR. CHIPMUNK

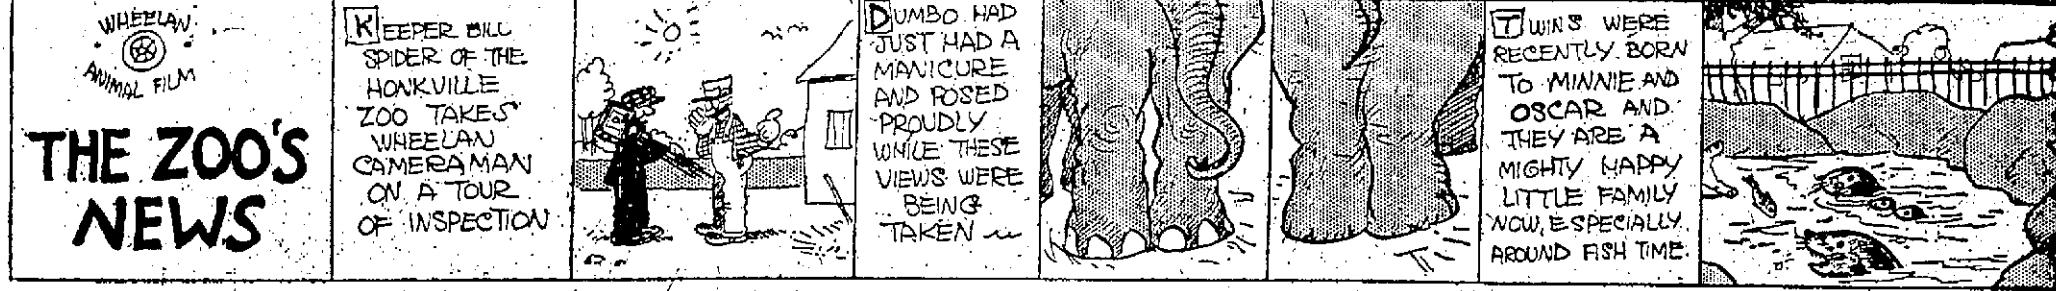

Very few city boys and girls ever get to know this striped little fellow, for he is one member of the squirrel family who will not come and live in our city parks. Mr. Chipmunk would much rather live out along the old stone fences and rocks, where he can dig his long tunnels and have a store room at the end, also you will find a dandy little bedroom there all filled with soft grass. He looks very much like he had toothache the way that his cheeks are all swollen, but they are pockets on the inside of his mouth which he fills with nuts and seeds and carries them to fill his store room for the long winter to come. Mr. Chipmunk is much smaller than his cousin Chatter, the tree squirrel. His stripes are black and yellowish, and run along his sides, a black stripe running down the middle of his back. The rest of his coat is reddish-brown and light underneath, and his tail is rather thin and flat.

WHEN A MAN'S MARRIED

Today's Short Story

By GEORGE T. BYE

Illustrations by ARLENE COYLE

Wellington Fields, Detective.

I remarked, with unnecessary impatience, "promptly engaged Wellington Fields to trace his father's money. The Fields were too monotonously in the right."

"That's because you lack imagination," the great detective reproved me sharply. "In the public library I have seen it has been advised to stick to the road—especially as it would do no good to the public to have it known that even people at fault come to me for help and get nothing more than a revelation of their own evil hearts. Why, there was the Foreman estate."

At the conclusion of the search the prisoner pointed to the dull looking gold and in a supplant tone hesitatingly asked the warden:

"Would you mind letting me keep it?"

"Why?" asked the warden.

"Oh, just a little sentiment. I suppose the prisoner explained. "You know, it's the first dollars I ever stole."

Flynn Foreman had made the common mistake of believing it was more important to accumulate a fortune than to make certain that his children were following in his tradition of honesty, energy and courtesy. Consequently, when he arrived at the stage of being a millionaire, he relaxed for a time, he was obliged to discover the hideous and one daughter was not better than a parasitic ectoparasite who would be satisfied to feed on him for the rest of their days.

"Before I unscrew the lid and reveal what this coffin contains, I wish to tell you your father is alive. He chose this way of forcing you all to go to work."

"You can retain me to locate him, but I should be successful in finding him, but I judge it will only embarrass you to find him."

"But it was father who was buried," protested Clyde.

"No, dummy, an exact likeness of your father," said the detective, removing the lid and tugging reluctantly at the corpse-like head.

"Wax—modelled by Flynn. The undertaker must have got a good fee for this."

Like most men who have amassed great fortunes, Foreman was ready to turn his attention to better things, to art and literature, but he lacked the composure. He did entertain Flynn,

and the Foreman family lot about the freshly dug grave, and the clay-smeared box was brought to the top. Fields ordered the grave, diggers away, and then addressed the shuddering brothers and sister:

"Before I unscrew the lid and reveal what this coffin contains, I wish to tell you your father is alive. He chose this way of forcing you all to go to work."

"You can retain me to locate him, but I should be successful in finding him, but I judge it will only embarrass you to find him."

"But it was father who was buried," protested Clyde.

"No, dummy, an exact likeness of your father," said the detective, removing the lid and tugging reluctantly at the corpse-like head.

"Wax—modelled by Flynn. The undertaker must have got a good fee for this."

A new story of Wellington Fields, Detective, will appear in this column every Saturday.

Holiday Hints

MENU HINT
Breakfast: Sliced Pineapple, Creamed Smoked Beef, Crumb Date Muffins. Luncheon: Sliced Fish Loaf, Vegetable Salad, Peach Marmalade. Dinner: Broiled Lamb Chops, Baked Stuffed Potatoes, Tomato Jelly Salad, Frozen Mini-Cream.

TODAY'S RECIPES

Crab Meat Canapes—This may be made from either the canned or the fresh crab meat. Chop one cupful of meat finely and add half a teaspoonful of salt, quarter of a teaspoonful of mustard, one teaspoonful of Worcestershire sauce, half a tablespoonful of lemon juice, the same of chopped parsley and half a teaspoonful of onion. Mix and add a dash of Tabasco sauce.

Muffins—For the crumb date muffins, mix together one cupful of dried sifted bread crumbs, one tablespoonful of melted cleomargarine, one tablespoonful of sugar, half a teaspoonful of salt and half a cupful of boiling water. When the ingredients have combined, add one well beaten egg, half a cupful of flour, one cupful of sugar and a dash of baking powder. Cream sugar and shortening. Add cornstarch, sour milk and soda, cocoa and flavoring in order given. Stir until smooth, then add flour and baking powder. Beat until light. Take 1/2 cupful of flour and mix with three teaspoonsful of baking powder. Beat well, turn into oiled muffin pan

BILLY WHISKERS

by FRANCES TREGO MONTGOMERY

Button had gone but half a block from the ship and a foolish dog followed him from the doorway. Now, if it had been any other dog, he would have chased him for in that way they would find him and help him out.

But he had ceased to hear their voices and was losing hope when he heard a man's voice saying:

"Where is that dog? I heard howling all if he were in distress. I can't see or find him anywhere."

Frusci, one of the boy's found Sputty. He was a cruel-faced boy who was just going to throw a stone and try to hit him on the head when the man said:

"Hi, there! What are you going to do? Not stone a half-drowned dog. I hope that's looking up pitifully into your face for help, and one that has never done you any injury! How would you like to have someone hit you on the head with a stone if you were nearly drowned?"

They pushed a plank in slantwise and Sputty climbed up on it and gave himself a shake, and tired and exhausted as he was, he wagged his stubby tail to thank the man for his kindness.

"Come here, you poor little fellow. I have taken a fancy to you. And as you don't belong to these children and seem to have no master, I will take you along home with me; and I don't think you will object to a good dinner. You are probably half starved."

Sputty thought his heart would burst with thankfulness and he made vow to himself that he would stay with that man until he did him a good turn as the man had done.

Sputty found that his friend lived in a poor quarter of the city, not far from the wharves, and he noticed that on the way there they passed many Chinese laundries and cheap grocery stores.

Presently the man turned into a place near a Chinese laundry.

HONEYMOONERS SEE FILM, AUTO, ELECTRIC LIGHT, FIRST TIME

Honolulu, T. H.—From their home in the small island of Niihau, of the Hawaiian group 260 miles west of Oahu, Uihuli, Kawahuanu, and his bride came to Honolulu, on their honeymoon and had their first taste of 20th century life, saw their first automobile and street car, gaped with amazement at the radio, and marveled at the electric lights, and never ceased wondering at the metropolitan building of Honolulu.

They explained that they had never before been off their native island of Niihau, one of the less important and less known of the archipelago. The said primitive conditions ruled mainly on the island, that the inhabitants still lived in the most part in thatched huts, obtained their simple clothing from the skins of the animals they shot, by catching a few fish and raising some crops, principally taro, from the roots of which "pol" the ancient food of Hawaii, is made.

Niihau is the last remaining stronghold of the ancient Hawaiian customs and mode of life. The island is owned by the Gay and Robinson estate and no person except a resident of the island may visit the place without permission of the estate.

The honeymooners probably told their neighbors tales that to them sounded wilder than the accounts of Baron Munchausen.

Nation's Beauty Spots, Even on Rock River, Are Named After the Devil

BY LEWIS C. FRENCH.
There is one unsolved mystery of scenic names—based on the reason and philosophy why nearly all natural wonders, freak formations and queer places are named after the Devil. It matters not where one goes—up Rock River to a pretty cliff formed by water rippling down from a high bluff to be named "The Devil's Staircase," to the Devil's of the Wisconsin or to the mountains of the east or west.

Each bit of really worth while scenery generally is named after Old Nick. And why?

Interesting rock formations here and everywhere have been foolishly named in the name of his Satanic Majesty. One would think that the inhabitants of Pandemonium—which is often expressed by a shorter word—had revisited the Earth to name the features which people desire to see for advertising the underworld.

There is certainly nothing undevout or atheistic about good scenery, narrow gorges, the canyons or clear pools. The Wisconsin Dells are littered with rocks which carry the title of the Devil. The same is true in Yellowstone and the Colorado Rockies. There is a bubbling hot spring beautifully colored, shaped like a skull. The guide calls it, "The Devil's Boiling Pan." Near Mammoth Hot Springs is an extinct geyser where one goes down a ladder to a long rock chamber to note the subterranean heat. Where once a geyser played, they call it "The Devil's Kitchen."

There is no need of reiteration.

Questions of guides, forest and park rangers, never being a satisfactory solution.

"I could never figure out why they named all the good scenery made by God to be worshipped as His work after the Devil," agreed one veteran guide in the Big Thompson canyon. "I got sick and tired of calling out the Devil's name at every stop. These mountains and canyon rock abode of devotion and homage. They have been dechristianized."

Incongruously there is a feature with a Biblical title, but alas, they are outnumbered a thousand to one and no one seems to know why!

But there is one place with a significant name, despite the conciseness of people to describe with the bromide—"wonderful." If there is any word in the human vocabulary that the golden fish was stricken out, it is that adjective "wonderful." It is applied to anything and everything.

The Yellowstone river lazily flows through Hayden valley in the park until it breaks into cascades, sharp and spirals, needle-like jag and pin-

Courtesy of the Bureau of Service
MOST COLORFUL SIGHT IN WORLD
Grand Canyon of the Yellowstone.

of water. Under the very edge of the falls an angler with boots and slicker is pulling out trout, which fight their way through the whirlpools of the water to be tempted by the fly.

In a few places there is steam rising, indicative of hot springs just beneath the rocks. A dangerous climb down the sheer trail and there is the great falls, a flickering bit of white silver set against the green of the top pines and the brown of the walls to the green moss where the spray moistens the rocks.

But look! Starting from the top and looking straight down, a rocky sheer and almost vertical. Erosion is a sculptor. He has carved graceful curves, needle-like jag and pin-

holes. He has gouged out holes, raised up Gothic towers where eagles and hawks nest.

Erosion is an artist. Every color of a glorious sunset, every tint of a rainbow is duplicated. Predominating is the clear yellow, which blends off into lemon and rose. Then a patch of maroon or flesh, red or purple and then flashing red. Those walls are adorned with color soft blends and rare tints. The sheer intensity frightens and awes. The color dances. One looks to seek out a new color and is bewildered to find every variation.

Hours pass by and it could be days and there is a new sensation to the eye every moment.

Walk down 450 steps to the brink of the great falls and there is a double rainbow in the midst. During the sun-up, when the streaks of light spread through the vast and yawning chasm, the mist and spray become a mass of glittering diamonds.

The river, after its enormous leap, becomes a shining mass and streak of silver with not a quiet pool.

Shooting spray 50 feet in the air and with an awesome thunder, the turbulent river dashes along, leav-

ing churning against the rocks. From Inspiration Point the hushed observer looks a thousand or more feet below. Three miles away is the great falls, a flickering bit of white silver set against the green of the top pines and the brown of the walls to the green moss where the spray moistens the rocks.

That is the "Grand Canyon of the Yellowstone." It is grand. If it had been named after Old Nick, the christener should have been shot at sunrise to be pitchforked by the ruler of the underworld for all time.

There have been efforts to have federal legislation passed to dam the Yellowstone for irrigation, to block the water and raise it back for power.

Corporations are seeking per-

mit to spoil the scenic spots that delight because government land can be leased and opened outside the park, bought by the dam at Kilburn and power companies will

spoil the Yellowstone if given a chance.

There can be thousands of irrigation dams and power plants, but there can only be one Grand Canyon of the Yellowstone, which took millions of years to build. There never will be another one. If even a dam is erected injuring the beauty of the park, there is one place a Devilish name would be appropriate.

"In Cradle of Deep."

After breakfast, most of us went to bed and slept till called for dinner. Soup, meat, potato and some other vegetable and some sort of pudding or dessert was the usual fare.

The afternoon was spent washing clothes, writing letters, reading or just chatting with others of the crew who were on deck. At four o'clock we went back to scrubbing wenchies or other cleaning till five, when we had a half hour off for supper. We usually had our work finished before 8 o'clock and simply stayed within call of the bos'n till relieved.

Our sleeping quarters were in the forecastle of the ship where one saw the full breadth of the rise and fall of the boat. The bunks were of iron with ordinary bed springs, mattress, sheets and blankets—rather comfortable in fact. Of course, with 25 sailors in one room, even though a good sized room, the air is not the best, particularly when the five or six port holes have to be shut to keep out the water.

Fortunately, sea sickness does not greatly affect me and I rather enjoy the voyage in spite of a few rainy days and an occasional heavy fog. After being relieved at 8 o'clock in the evening, I often stayed on deck for an hour or two and, leaning over the side of the ship, watched the rise and fall of the sea as the great ship plunged on and on into the big rollers.

COUNTY TO EXHIBIT AT STATE EXPO

Rock County will be represented at the Potato exposition in Milwaukee December 5-11 with tobacco and vegetable displays.

In the exhibit there will be samples of state inspected seed, and graded potatoes by representatives of the department of markets. Twenty counties will be represented. The feature will be an exhibit of consumers for farm products, and supplies.

The "big four"—producers, manufacturers, distributors and consumers—will cooperate in making the combined exhibition a tremendous force in the advancement of agriculture.

TRY WAR METHODS TO KILL TREE "COOTIES"

"Gas, alert." Oh, no soldier, it is not an eruptive shell or a cloud drifting over the land to destroy humans—rather plant cooties.

Gas war fare is now being advocated in this country against insects which damage trees, plants and shrubs. Cases set loose in an orchard are a cure for intrusions of tree pests.

One pest, the tree borer has caused

extensive damage, drilling auger-like gas mask.

MARCHING LEGION

"For God and country, we associate ourselves together for the following purposes:

"To uphold and defend the constitution of the United States of America; and the state of Wisconsin; to maintain law and order; to foster and perpetuate a 100 percent Americanism; to preserve the memories and the incidents of the great war; to inculcate a sense of individual obligation to the community, state, and nation; to combat the autocracy of both the classes and the masses; to make right the master of might; to promote peace and good will on earth; to safeguard and transmit to posterity the principles of justice, freedom and democracy; to consecrate and sanctify our comradeship by our devotion to mutual helpfulness."—Constitution American Legion.

NEXT MEETING

The next meeting of the local post will be held Tuesday night at 8 o'clock in Moose Hall in the Myers Theatre building.

FORMAL INITIATION

For the first time since the organization of the Richard Ellis Janesville Post, the authorized national ritual will be put into effect at the meeting Tuesday night. This was decided at an informal meeting of the executive committee held at the Grand Hotel last Tuesday.

Each officer will have his station in the several sections of the room with the Post Commander, Dr. Leight J. Woodworth in the front of the room, with Adjutant T. Clark at his side. The sergeant-at-arms during these ceremonies, will be giving the password to the post commander.

The purpose of the initiation or the ritual is to give more of a fraternal and business-like tone to each session of the post. It will lend greater dignity, and at the same time enable business to be carried out in a more orderly and rapid fashion.

A part of the new plan, all-in-

ing and churning against the rocks.

From Inspiration Point the hushed observer looks a thousand or more feet below. Three miles away is the great falls, a flickering bit of white silver set against the green of the top pines and the brown of the walls to the green moss where the spray moistens the rocks.

But look! Starting from the top and looking straight down, a rocky sheer and almost vertical. Erosion is a sculptor. He has carved graceful curves, needle-like jag and pin-

holes. He has gouged out holes,

raised up Gothic towers where eagles and hawks nest.

Erosion is an artist. Every color

of a glorious sunset, every tint of a rainbow is duplicated. Predominating is the clear yellow, which blends off into lemon and rose. Then a patch of maroon or flesh, red or purple and then flashing red. Those walls are adorned with color soft blends and rare tints. The sheer intensity frightens and awes. The color dances. One looks to seek out a new color and is bewildered to find every variation.

Hours pass by and it could be days and there is a new sensation to the eye every moment.

Walk down 450 steps to the brink of the great falls and there is a double rainbow in the midst. During the sun-up, when the streaks of light spread through the vast and yawning chasm, the mist and spray become a mass of glittering diamonds.

The river, after its enormous

leap, becomes a shining mass and streak of silver with not a quiet pool.

Shooting spray 50 feet in the air and with an awesome thunder, the turbulent river dashes along, leav-

ing holes. He has gouged out holes, raised up Gothic towers where eagles and hawks nest.

AFTER BOLSHEVISM—WHAT THEN?

(Part II. Economic Development in Russia in the Near Future.)

BY A. J. SACK,

Director of the Russian Information Bureau in the United States; Author of "The Birth of the Russian Democracy."

THE problem of Russia's economic development after the downfall of Bolshevism is by no means a Russian problem only. It is a European, and even a world problem, inasmuch as the industrial paralysis of Russia, brought about by Bolshevism, affects the economic system of entire Europe, and is reflected in the conditions even on this side of the ocean. The present economic depression in this country is due, to a great degree, to the unsettled economic conditions in Europe. At the bottom of the continued economic crisis in Europe lies the fact that Russia, a great European Power, three times as large as the United States, remains paralyzed for the past four years. The importance of Russia's resurrection, of the development of her enormous natural resources, for the economic reconstruction of Europe is being more and more recognized. Mr. Otto H. Kahn, the noted New York financier, summed up the situation admirably in his sentence, in a statement published on September 1st, this year, upon his return from Europe. "The eyes of the industrial nations of Europe are on Russia," said Mr. Kahn, "as the new land of unlimited possibilities."

Now Lies in Ruin.

This new land of unlimited possibilities now lies in ruins. The results of the economic policy of Bolshevism are well known. According to the report read at the Congress of the representatives of Russian industry, commerce, and finance, held in Paris on May 17-24, this year, the production of bituminous and anthracite coal in Russia in 1920 amounted only to 20 per cent. of what was produced in 1916.

The amount of coal actually shipped from the mines totaled only 15.6 per cent. of the amount shipped in 1916. The production of ore in 1920 amounted to 1.2 per cent. as compared with that of 1916. The flux crop in 1920 amounted to 8 per cent. of that harvested in 1916.

The data are taken from the official Bolshevik press. Further data may be found in the Moscow "Pravda" of August 16, 1921, in an article by J. Larin, in which Russia's industrial production for the first half of 1921 is compared with that of the first half of 1913. According to this article, the output of coal and petroleum in 1920 amounted to 18 per cent. pig iron, 2.2 per cent. and cotton materials 6 per cent., as compared with the production of the corresponding period of 1913. In the Moscow "Pravda" of July 16, 1921, we find an editorial in which the frank admission is made that "the condition of all branches of the national economy of Russia must be catastrophic, and near a catastrophe, and that this is not a mere political Decrease."

The four years of the Bolshevik rule have also brought about the destruction of transport and shrinkage of the area under agricultural cultivation. In his address before the Eighth Congress of Soviets, Trotsky himself acknowledged that "about 54,000 versts (1 verst equals .66 miles) of Russian railroads were destroyed, that over the entire part, 15,000 versts remain intact; 20,000 bridges and 16,000 telephones and telegraphs have also been destroyed, and we have about 61 per cent. of sick locomotives." ("Izvestia" of December 28, 1920.) Speaking at the recent Moscow Conference of the Communist Party, Kameneff, the President of the Moscow Soviets, said, according to the official Bolshevik "Pravda" of June 16, 1921, that "as a result of the food losses, there is a terrible shrinkage of the area under agricultural cultivation, the decrease, amounting to nearly 25,000,000 desiatines (about 67,500,000 acres). We have reached the stage where the incentive for developing their farms has almost disappeared among the peasants." The Bolshevik police chief, Kameneff, has resulted in agriculture having to go to half of its former extent, while the industries, even according to an optimistic estimate, produce only one-seventh of what was produced before."

Just Reds or Die.

Such are the conditions brought about by Bolshevism. The situation is catastrophic, and Russia must either perish or repudiate the principles of communism, both in its political and economic expression. The dictatorship of the proletariat, which in reality is a bloody dictatorship of the Communists, must be repudiated, since it destroys the individual, deprives him of the right to breathe freely to create and to enjoy the product of his creation. Economic communism, with all the much-advertised reforms and "concessions" promulgated by Lenin, still retains the main industries and the transport as the property of the Bolshevik State, which, in its turn, under communist principles, must also be repudiated because this is exactly the system that has brought Russia to ruin.

The recognition of the principle of private property, both in industry and in agriculture, is the only way to bring Russia back to economic normality and to reestablish her in her proper place in the economic community of the nations of the world. It is clear that such recognition lies entirely outside of the ideology of Bolshevism. Therefore Lenin and his friends are unable to make the concessions that would really mean the beginning of Russia's resurrection. All their reforms are within the Bolshevik system, and therefore they do not relieve the situation, which is already impossible both for the urban and the rural population of Russia. It is futile to expect that Bolshevism will commit suicide, and therefore it must be expected that it will be destroyed by the nation in its struggle for life.

Peasant Main Actors.

In this struggle the Russian peasantry is playing the main part. In the process of the Revolution the peasants obtained the land. They want to own and to cultivate it. They want to start an industrial production in the cities, and would give them all the things they need in exchange for the surplus foodstuffs in their possession. They want a normal intercourse between Russia and the outside world that would enable them to obtain the agricultural machinery and technical implements that can be mostly obtained through im-

portation. Finally they want a stable democratic government which they themselves would control and which would protect them and make it possible for them to realize the fruits of their labors.

The peasants have never supported communism. As to the workingmen in the cities, it must be said that even they are thoroughly disillusioned and understand the futility of the Bolshevik experiments. The so-called "classless society of the proletariat" has long ago degenerated into a dictatorship over the proletariat, ever since the Russian working class came to a decisive opposition to the Bolsheviks. The first labor movement against Bolshevism, on a large scale, took place in Petrograd in the spring of 1918.

Prepared for Step.

Thus, it may be said that all Russia, urban and rural, is thoroughly prepared for the only step that can save and reestablish Russia—and that is the return to democratic institutions in her political life, and capitalism in her economic existence. The object of the last four years is as clear and impressive as that even the Bolshevik leaders concede that Russia's economic existence and development are impossible without the establishment of capitalist production. They prefer foreign capital and are taking great pains to advertise the concessions they are ready to grant to foreign capitalists to obtain the capital needed to combat the preservation of the Bolshevik rule in Russia. But, the foreign capitalists do not seem anxious to take advantage of the Bolshevik offers. It is clear that foreign capital will not flow into Russia unless investments in the Russian industries are made both profitable and safe. It may be said that these investments will prove endless resources open for permanent work. But, they can be made only if the principle of private property is reestablished and is recognized as the fundamental principle upon which Russia's economic life must rest. The half-hearted recognition of this principle, only for foreign capital, working with the Bolshevik system, can not and will not satisfy the foreign investors.

Come From Switzerland.

The Brown Swiss raised around Janesville are mentioned as a ready market, not only in this country but in Japan, the Pacific Islands, and South America. They cannot equal the Holstein for milk production. Theirs is Southern Wisconsin dairy type of cattle, rapidly coming to the front in Southern Wisconsin. There is no finer looking domestic animal than a well marked, pure bred, Brown Swiss. A herd of the fawn colored cattle in a good pasture setting, goes to make a pastoral scene worth looking at and enjoying.

Cooperative Boosting.

What a difference it would make if all farmers united and concentrated to improve and boost and cooperate on their breeds. It would matter not whether a prospective buyer wanted Holsteins, Guernseys, Short Horns or Brown Swiss, he could be sure to find all his wants within the county. There are buy-

ers in the county daily. With improved herds, an accurate system of listing stock with a central agent, intelligent publicity work, and there would be a turn over of thousands for the breeder.

Now the pure-bred breeder does not have to go off to Japan or Mongolia for his cattle. His best market is in Southern Wisconsin. His biggest problem is to convince the farmer to raise good cattle. It takes no more feed, with little additional cost after the start, and the results are there in cold, hard figures, and that is what counts.

MAY TEACH SAFETY

IN CITY SCHOOLS

Safety study was made a part of the school curriculum in Wisconsin by the passing of Law 147 two years ago, according to Sup't F. O. Holt. The legislature neglected, however, to allow funds for the distribution of literature on this subject, and as a consequence it has been neglected.

Safety, patriotism and other subjects of this nature, which a few years ago were not included in the school work, are taught in the Janesville schools with regular subjects. The subject of patriotism was introduced into the schools through the instigation of the American Legion and taken up as a part of citizenship.

Mr. Holt believes that the subject of safety could be taught to advantage with arithmetic, explaining that these things can be taught only through some connection with regular classes.

Cooperative Boosting.

PRINCETON MINUS STARS, BUT GAME FOR BIG STRUGGLE

[By ASSOCIATED PRESS]
Princeton—Princeton faces the University of Chicago Saturday in the first inter-sectional football battle the Tigers have played since they turned back Michigan with a defeat in 1881.

The Chicago squad was due to arrive in Princeton from Trenton about 1 o'clock. The westerners brought with them a big cheering section and have taken nearly 3,000 seats in the west side of the big concrete horse shoe.

The Tigers will enter the contest minus the services of several stars. Harry Garry, Dick Newby and Don Larie all are out with injuries. Baker, MacPhee and Gray, all of whom started in the Navy game last week, will watch the fray from the side lines. The westerners are reported in good shape. The line-up:

Princeton—
Tyson ... LT ... Strommell
Keck ... LG ... Fletcher
Von Schilling ... C ... King
Wittner ... RG ... Redmon
Moore ... RT ... McGuire
Hooper ... RE ... Crisler
Stinson ... QB ... Romer
Enwar ... QB ... Cole
Gilroy ... LHB ... Hurlbert
Smith ... PFB ... Hermans
Van Gerbig ... FB ... Hermans

Basketball Is Assured With Rink Reopening

With the floor entirely renovated and decorated with changing fall leaves, the rink opens at the old site on South River street Saturday night. The new managers are Mace & Associates.

The opening will be made although refinishing of the place has not been completed. Installation of a refreshment room and erection of bleachers are yet to be done.

The Bover City band will furnish the music. A stand has been constructed for them on the south side of the building.

Railings have been erected around the rink too proper. New sanitary favors have been installed. Large furnaces will keep the auditorium heated.

Reopening of the rink assures that Janesville will go back into its position as one of the leading basketball cities of the west.

\$400 in Prizes in City League

Prizes totalling \$400 will be given to the city bowling league this season, according to plans laid out by the league at a meeting held in the Gazette Office Friday night. There will be \$5 in all, graduating from \$50 down to \$1.

In regard to absences, Secretary George Kueck was instructed to give each team captain a sum covering him that upon his return to town he would be deducted from the money will be deducted from the prizes at the close of the season.

The prize list follows:

Team Prizes:
First \$50; second \$40; third \$30; fourth \$25; fifth \$10; sixth \$10.

High Team Score, \$6.

First, \$18; second, \$12; third, \$6.

High Team Score, Single Game.

First, \$12; second, \$8; third, \$6.

High Individual, Three Games.

First, \$12; second, \$8; third, \$4.

High Individual, Single Game.

First, \$8; second, \$4; third, \$3.

High Individual Average.

First, \$80; second, \$18; third, \$16.

\$10; fourth, \$14; fifth, \$12; sixth, \$15; seventh, \$8; eighth, \$8; ninth, \$5; tenth, \$6; eleventh, \$8; twelfth, \$4; thirteenth, \$3; fourteenth, \$2; fifteenth, \$1; sixteenth, \$1; seventeenth, \$1.

EDGERTON INVADES MONROE SATURDAY

(Special to the Gazette.)

Monroe—For the first time in several years Monroe and Edgerton clash upon the gridiron Saturday.

Edgerton has had only one defeat and has trimmed Walworth and Stoughton. On the other hand Monroe has three victories upon their slate.

BRINGING UP FATHER

Copyright 1920 by Geo. McManus.

18 Local Boys Go to Bring Bacon Home

With confidence 18 members of the local high school football team departed in motor cars for Jefferson shortly after 9 o'clock Saturday morning. They are to play the high school of that town, an enemy that heretofore has held the stage in the locals in every department of the game.

The men who are making the trip are: Knipp, Chapman, H. Casey, Grindle, Conroy, Schultz, Gridley, Townsend, Conroy, Stoddard, Lane, Young, McDonald, Lester, Moore, Keely, Seaman and J. Casey.

They are accompanied by Coaches Raynor and McDonald.

A large number of Blue fans are journeying with the team to root for victory.

Electric baths and message. O. Fredholm, 219, W. Milwaukee. Advertisement.

Cambria, Mass.—Harvard shaken by injuries opposed Penn State, its most formidable rival to date, in the stadium today, outweighed for the first time this year.

New Haven, Conn.—The Army came from the banks of the Hudson to the playground of the Yale Bull dog today for a football battle.

New York—Rocky Kansas, Buffalo lightweight, won the judge's decision over Lew Tender in a 15-round bout.

The chances of the two look about even.

Outside of the conference, the game of most interest in the west Saturday is at Notre Dame, where Nebraska has come in an effort to repeat its performance of Iowa by beating Indiana, Iowa, Northwestern and Purdue are idle Saturday.

Only 4 Vets of Illini in Badger Game

[By ASSOCIATED PRESS]
New York—"Babe" Ruth, home run king, abandoned his exhibition tour and expressed regret at having violated the rules of organized baseball by having cinged in post season games.

Yank Schooner Loses Rigging and First Race

Midway, N. S.—Elsie of Gloucester won her fourth consecutive race Saturday on the fourth leg of her first race with Blue nose of Lunenburg. The Yank Schooner, built by four veterans, was first, while Jack Crangle, fullback, was ready to go in, due to an injury and Carney, end, was also out. The loss of the two men was a setback to Illinois hopes.

The line-up:

Wisconsin—
Tyson ... LT ... Rechel
Brader ... LT ... Olander
Christiansen ... LG ... Mohr
Bunge ... C ... Anderson
Nelson ... RG ... Braver
Brumm ... RT ... Wilson
Teborn ... QB ... Walquist
Elliot ... RHB ... Feder
Williams ... LHB ... Tabor
Sundt ... FB ... Crangle

Jack-Jess Go Next July 1:

[By ASSOCIATED PRESS]
New York—Jess Willard will attempt to regain the world's heavyweight championship from Jack Dempsey at Jersey City, next July 1, Tex Rickard, promoter said Saturday.

With the floor entirely renovated and decorated with changing fall leaves, the rink opens at the old site on South River street Saturday night. The new managers are Mace & Associates.

The opening will be made although refinishing of the place has not been completed. Installation of a refreshment room and erection of bleachers are yet to be done.

The Bover City band will furnish the music. A stand has been constructed for them on the south side of the building.

Railings have been erected around the rink too proper. New sanitary favors have been installed. Large furnaces will keep the auditorium heated.

Reopening of the rink assures that Janesville will go back into its position as one of the leading basketball basketball cities of the west.

\$400 in Prizes in City League

Prizes totalling \$400 will be given to the city bowling league this season, according to plans laid out by the league at a meeting held in the Gazette Office Friday night. There will be \$5 in all, graduating from \$50 down to \$1.

In regard to absences, Secretary George Kueck was instructed to give each team captain a sum covering him that upon his return to town he would be deducted from the money will be deducted from the prizes at the close of the season.

The prize list follows:

Team Prizes:
First \$50; second \$40; third \$30; fourth \$25; fifth \$10; sixth \$10.

High Team Score, \$6.

First, \$18; second, \$12; third, \$6.

High Team Score, Single Game.

First, \$12; second, \$8; third, \$6.

High Individual, Three Games.

First, \$12; second, \$8; third, \$4.

High Individual, Single Game.

First, \$8; second, \$4; third, \$3.

High Individual Average.

First, \$80; second, \$18; third, \$16.

\$10; fourth, \$14; fifth, \$12; sixth, \$15; seventh, \$8; eighth, \$8; ninth, \$5; tenth, \$6; eleventh, \$8; twelfth, \$4; thirteenth, \$3; fourteenth, \$2; fifteenth, \$1; sixteenth, \$1; seventeenth, \$1.

EDGERTON INVADES MONROE SATURDAY

(Special to the Gazette.)

Monroe—For the first time in several years Monroe and Edgerton clash upon the gridiron Saturday.

Edgerton has had only one defeat and has trimmed Walworth and Stoughton. On the other hand Monroe has three victories upon their slate.

FIFTY SIX YEARS WITH ONE RAILROAD—NEVER HURT IN ACCIDENT

John Dower Has Been So Many Miles Since He Began Railroad-ing That it Staggers Imagination —Now Retired and Lives Here

One hundred and 13 times around the world!

Based upon the number of miles he traveled in his 55 years and eight months as an employee of the Chicago & Northwestern railway, that is the distance that John H. Dower, 403 South Main street, this city, has covered. He was pensioned recently as a conductor on the C. & N. W.

His experience took him 2,820,000 miles. It started as a messenger in the time of "dinky" freight cars and reached its height on luxurious fast trains.

Almost three million miles rattling along the rails in switch engine, on freight car, in caboose, in coaches is a long way to 30. It is three round trips to the moon. It is 884 trips from New York to San Francisco.

In a year, Conductor Dower averaged 55,294 miles. As conductor of passenger trains, the distance reached 60,000 miles annually.

John Dower left the service of the Northwestern voluntarily last July 1 at the age of 69. He lacked two years of the age limit.

Looking over his experience, he acknowledges his gratefulness to the officials of the road for the fine treatment which he has always received from them.

John Dower's Last Run.

His last run was on Train No. 525-5 between Madison and Janesville and 21-2 between Janesville and Watertown. He left Madison at 6 a. m., reaching here at 7:10. The train then left here at 8 a. m. for Watertown coming back here at 8:15 and leaving at 8:35 p. m. for Madison.

Coming from Watertown, N. Y., Dower took his first railroad job in November 1853, as a messenger on the Oshkosh terminal. He was then at

the tender age of 13, an age that would be laughed at now if a lad tried to get a job. His father worked in the railroad wood yard and that was how he got the place.

Had Odd Jobs.

For two years he did odd work around the shops and audience and then was put to drive a switch engine. Firing in those days was throwing coal into the yawning furnace with coal-burning locomotives were unknown.

He helped push freight cars around the Oshkosh yards with this engine for two years and then was assigned as "brakeman" on a west freight running between Oshkosh and Fort Howard. Braking in those days was no simple matter. The automatic coupling had not yet been invented and the old hand brake was still in use. Cars had to be held together in trains by the old Lincoln pin and it was not unusual for a brakeman to get caught between cars and sustain serious injury.

Conductor on Ore Train.

After four years of brakeman, he was transferred to the Peoria division as conductor on an ore train during the summer of 1859. He was then 20 years old and a conductor of a freight, a thing unthinkable in these days. His train ran between Escanaba and Cascade. Ore trains then ran only from May until late fall.

From that run, he was sent to the Madison division headquarters at Bar-

the-Orie

by Booth Tarkington Illustrations by Irwin Myers

Kopright 1921 by the Bell Syndicate, Inc.

(Continued from last Saturday.)

"Well, I'd care about it if it's a secret," Florence insisted. "If it's a secret, I'd want to know it, whatever it's about."

"Oh, it isn't a secret, particularly. I suppose, at least, it's not to be made public for a time; it's only to be known in the family."

"Well, didn't I just prove I'm as much one of the family as any?"

"Never mind, my father said apologetically. "I don't suppose there's a better man in you knowing it—if you won't go telling everybody. Your aunt Julia has just written that she's engaged."

Mrs. Atwater uttered an exclamation, but she was too late to check him.

"What's the matter?" he asked.

"I'm afraid you oughtn't to have told anyone. She isn't the most discreet."

"Fshaw!" he laughed. "She cer-

tainly is one of the family, however,

"All in the world who said about him was that he's a lawyer. He may be a widower for all we know, or di-

vored, with seven or eight children."

"Oh, no, Mollie!"

"Why, he might!" she insisted.

"E'f'ew, you know, he may be a

widower for a third or fourth time,

or divorced, with any number of

children. If such a person proposed

to Julia, you know yourself she'd

hate to be disappointing!"

Her husband laughed. "I don't

think she'd go so far as to actually ac-

cept such a person and write home

to announce her engagement to the

family. I suppose most of her swains

here have been in the habit of pro-

posing to her just as frequently as

she does to me."

"Take it pretty hard!" she echoed

loudly, and then, one of 'em, at least,

which will just as well lose his reason:

"Which one?"

"Noble Dill!"

At this, the slender form of Flor-

ence underwent a spasmodic seizure.

In her chair, but as tho' it was short,

and also noiseless, it passed without being noticed.

"Yes," said Mrs. Atwater thoughtfully, "I suppose he will."

"He certainly will!" Mrs. Atwater declared. "Noble's mother told

me last week that he'd soon be

lost his life to drop a fountain

pen in his coffee as a lump of sugar;

and when anyone speaks to him he

either doesn't know it or else jumps

when he says anything himself, she

says, they can scarcely ever make

out what he's talking about. He was

trying enough before Julia went

away; but since she's been gone Mrs.

Dill says he's like nothing in her ex-

"But we don't know anything at all

about the young man," he remon-

strated.

"How do you even know, he's

young?" Mrs. Atwater asked crisply.

"I'm afraid you oughtn't to have

told anyone. She isn't the most

discreet."

"Fshaw!" he laughed. "She cer-

tainly is one of the family, however,

THE CITY MANAGER LABOR MEN FIND IT FIELD FOR SERVICE

BY H. S. GILBERTSON

(This is the thirteenth of 14 articles on the City-Manager plan by H. S. Gilbertson of the National Municipal League.)

If by democracy one means "dictatorship of the proletariat," then the city-manager plan is not democratic. The idea which it does serve is government by the whole people.

Class government, whether it be by the business class or the working class is contrary to its spirit; nevertheless whenever organized labor has sought a more definite representation, it has been accorded.

For instance, in the first commissions in Dayton, Dubuque, St. Paul, Springfield,

O., and various other cities, there were representatives of organized labor. In fact, labor's leadership was taken in on the ground floor and given a voice in the framing of the charters; a condition which has been repeated in many cities.

Standusky, O., elected a mechanic to its first commission. As a member of the council, he could select his valuable viewpoints to the joint discussion of municipal projects.

He was the most anxiously awaited voice in the discussion and other councilmen, merchants to whom the views of labor were mysteries, deferred to his superior knowledge of the popular effect of their proposed acts in certain quarters of the town.

Labor has sometimes been suspicious that the plan would be "capitalistic," especially where the movement for its adoption originated with a chamber of commerce. But, in more numerous instances, it has

(NEXT ARTICLE: The Democracy of It.)

Brodhead

Clinton

(By Gazette Correspondent)

Brodhead—The Methodist morning church will give a harvest home concert at this church Sunday afternoon, Nov. 6, under direction of Mrs. A. F. Pierce.—Robert Hawkins and family are preparing to move to Colorado next Wednesday. Mr. and Mrs. Harry Brobst made arrangements for an extended stay.—Mrs. George E. Beloit is spending a few days with friends in Janesville—Charles Luchsinger, Janesville, is home on an extended vacation on account of an attack of rheumatism.—Attorney H. M. Cardine returned from Monroe Thursday, where he attended court. Miss Preston spent Thursday in Janesville.—Mrs. S. Straw is in Beloit; the guest of her daughter, Mrs. Lucy Brown. Arrangements are going forward for the proper observance of Armistice day in Brodhead.—Miss Esther Guda, who was a visitor in Brodhead Thursday—Miss Genevieve Howe is at her home in Beloit for a week.—F. E. Corson, Monroe, visited in Brodhead Thursday.—W. H. Clarke, Waterloo, Ia., is visiting old friends in Brodhead.—V. Corson, Juda, spent Thursday night in Brodhead.

Milton

(By Gazette Correspondent)

Milton—Eugene Colvin, Appleton, visited Milton acquaintances Thursday.—Mr. and Mrs. Francis Hurley, Riverside, Calif., were in town Thursday. They were on their wedding tour.—Miss Mary Borden is visiting friends in Chicago and Evanston, Ill.—Herbert Gould, the Chicago botanist, will open the W. Y. T. Club's lecture room here Thursday night. Reserved seats on sale at Rogers' Monday at 4 p. m.—W. C. T. U. meets with Mrs. Chas. Hackbarth Tuesday.—Mrs. Chas. Post, Chicago, is visiting her parents, Mr. and Mrs. D. D. McKay this week.

Brick "Bonds"

One of the fascinating features of modern brick Craftsmanship is the great variety of effects obtainable by the employment of "wall bonds."

There are numerous interesting brick wall bonds possible, which any mason can lay, such as the English, Garden Wall, Flemish, Dutch Cross, besides an endless variety of brick patterns and other combinations to the wall of variegated brick.

They are inexpensive to lay and add hitherto undreamed of beauty to the wall of brick.

Janesville Brick Works

1701 Pleasant St. Janesville, Wis.
Bell, 247. R. C. Black 891.

Footville

(By Gazette Correspondent)
Footville—Mr. and Mrs. Pearl Dean went to Illinois Saturday to attend the funeral of James King, who died while on a trip to California. He visited at the Dean home here before leaving. The funeral will be held Sunday.—Mr. and Mrs. Henry Young spent Tuesday in Janesville.—Mrs. Engleke, who spent several weeks here, went to Janesville Saturday, where she is visiting Mr. and Mrs. O. D. Antissel.—Mr. and Mrs. Melvin Chapman spent Wednesday with Mr. and Mrs. Zebel Hanover.—George Hatton is constructing a concrete bridge near the railroad track on Janesville street.—Mrs. George Schumacher spent Wednesday with her son Leon Spence.—The Hayes Daughters and their mother, Mrs. Bert Gooch, Friday afternoon. They are planning a bazaar to be given Dec. 3 in the Footville hall.—The Missionary society met with Mrs. Bessie Howe Wednesday afternoon.—Mrs. Edward Palmer's condition is worse.—The concert will be given at the Methodist church next Monday night.—Mr. A. M. Anderson was called Monday to the death of his brother, Julius Knott, who died Saturday night a week ago after an illness of two months. Funeral services were held Sunday. He would have been 72 years old Oct. 29.

I see nothing undemocratic in having the city manager selected by the commissioners. A city manager doesn't rule anybody. He doesn't pass any laws. He doesn't determine any public policies.

"I'm for the city-manager plan because it makes possible the elimination of politics from public business and that means better government and lower taxes."

When the city manager idea was proposed to Lorain, O., union labor in Beloit, W. Va., asked what its experience had been with the city manager plan. The trades and labor assembly, after long and thorough discussion, sent back a full and vigorous endorsement.

(NEXT ARTICLE: The Democracy of It.)

Afton

(By Gazette Correspondent)
Afton—Mr. and Mrs. Philip Nehling entertained at a family dinner party Sunday. The occasion was in honor of Mr. Nehling's 50th birthday anniversary. Guests following were present: Mr. and Mrs. H. Nehling, Mr. and Mrs. Philip Nehling Jr., Sharon; Mr. and Mrs. Gus Shimeal, Janesville; Donald Holt, Delavan, and Mr. and Mrs. Joseph Burrier, Mrs. James Holmes and children, James Seals, James Seals, Jr., and Leslie Seals, Afton.—The Afton Cemetery association will hold its annual meeting Monday night, Oct. 24, at Stink-

man's hall.—Edwin Johnson attended the Ladies' Aid society meeting at the Luther Valley church Tuesday.—The Royal Neighbors held a meeting at the home of Mrs. T. A. Corcoran Thursday to plan on articles for a bazaar which they will have in the near future.—Albert Engleke, Orfordville, spent the week-end with his parents, Mr. and Mrs. August Engleke.—Mrs. Ruby Hammel has returned home after a month's visit in Europe.—Mrs. Edna Hammel have moved into their new home, which was recently completed.—Miss Zena Kilefath and Mrs. Delta Luedtke, Janesville, were guests of Mrs. Fred Millard Thursday.—Franklin Uehling, West Salem, was the guest of the Lehling family for a week.

KOSHKONONG
(By Gazette Correspondent)
Koshkonong—Mrs. Will Ziebell entertained her aunt, Mrs. Pufahl and cousin, Anna Luttig, Wednesday.

Frank Gray is remodeling his barn.—Mr. Walter Culkin, Jr., and sons, Dean and Rush, spent Tuesday with their sister, Mrs. Robert Westrich Miller.—James McEvane spent Sunday at the home of his parents, visiting his sister, who is here from Chicago.—Julius Knott, who died Saturday night, had his funeral service removed.—Mr. Fleener, Lake

Mills, visited Emil Schroeder Sunday.—Mr. and Mrs. Irving Kitzke and daughter, Wilma, Newville, spent Sunday evening at Robert Traynor's.

Mr. and Mrs. Will Ziebell visited the latter's sister, Mrs. Beebe, Beloit Sunday.

HINTS FOR THE MOTORIST

by ALBERT L. CLOUGH

Copyright, 1921, by the International Syndicate

Keeping The Water Pump Tight

Plentiful Pump Lubrication Makes Packings Last Longer.

After a CIRCULATING PUMP has been in use for some time, leakage of water often commences along its driving shaft, past the packing under the stuffing nut and ordinarily tightening the stuffing nut there may be one on each side of the pump will restore tightness. As a rule, to tighten the packing, the nut is turned in the direction of rotation of the shaft, which may be either right or left handed. Only sufficient tightening to stop the leak is advisable, on account of the danger of making the shaft turn too hard, which in the case of a belt-driven pump may stop it from operating and, with a gear drive, may result in overheating or roughing up the shaft. In case the packing is worn out and tightening fails to stop the leak, repacking becomes necessary. The stuffing nut should be backed off and the old packing unwound from the shaft, note being taken of the length and kind of the old packing, if this is determinable, cotton wicking, thoroughly rubbed with graphite and oil, or prepared graphite hot-water packing, is the material generally used. The correct length and size of new packing should be used and this should be wrapped neatly around the shaft, in the direction in which the nut is to be turned on, pushed into the stuffing box and the nut screwed on far enough to secure tightness.

OVERSIZE TIRES

W. R. W. writes: I have substituted 38x4½ in. tires for the 32x4 in. ones which were sent with my car. Will this have any effect upon the speedometer, which is driven from the transmission? Do you recommend oversize tires?

Answer: Both your speedometer and mileage calculations will be nearly 10 per cent lower than that should be. Each size of tire is adapted to operate economically under a load not exceeding a certain figure set by its manufacturer. In case the actual weight carried by a certain tire exceeds the recommended amount, it may prove advisable, on the ground of economy, to substitute a tire of oversize dimensions, especially if the car upon which it is used is operated intensively. The use of oversize tires lessens the possibility of tire trouble and many people are then partly responsible for this account.

POLARITY OF GENERATOR

R. H. E. asks: How can I tell the positive side of the generator from the negative? Answer: The practice followed by most manufacturers is to ground the positive side of the battery, thus providing for the connection of the generator to the negative battery terminal. This calls for the grounding of the positive side of

Questions of general interest to the motorist will be answered by Mr. Clough in this column, space permitting. If an immediate answer is desired, enclose self-addressed, stamped envelope.
